

Senior Transportation Designer (m/f)

Location

Denmark, Copenhagen

Description

Skibsted Ideation is looking for a Senior Designer focused on Transportation Design to work on the development of exterior and interior designs of innovative electric vehicles.

You will be directly involved on a range of exciting Transportation projects, from concept sketching, to CAD modeling and development for production. You will be required to translate research into meaningful design propositions, and turning ideas into viable 3D models. A combined interest of electric vehicles and consumer products is crucial and experience the both industrial design agencies and the automotive industry is a plus.

Reporting to the Design Lead, the Senior Industrial Designer is responsible for developing and overseeing exterior and interior designs of electric vehicles. The designer will work closely in collaboration with Digital Modelers and Engineers to ensure the design strategy is materialized in both digital and physical models through all phases of design and product development processes.

Your Profile

- Bachelor or higher Degree
- 5+ years of experience in Transportation Design (Product Design & Industrial Design knowledge is a plus)
- Very good knowledge of Autodesk Alias, Solid Works and Adobe CC (additional tools are a plus)
- Good knowledge of Photoshop
- Ideally experience in the Automotive industry (exterior & interior design exposure)
- Very good English skills (written + spoken)
- Good analytical, communicative and conceptual skills
- A very good team player

Responsibilities

- Leading your own team for collaboration on a range of advanced design and production programs
- Collaborating cross functionally with all team members
- Provide own creative input and present ideas
- Meet design specifications from Engineering and deadlines established by Design Managers
- Work closely together with Engineering on design solutions, that can be brought to production
- Create renderings and animations for presentations and reviews
